Education

Jaypee University of Information Technology, Solan

2024 – 2028

B.Tech in Computer Science & Engineering (AI/ML) | CGPA: 7.57

Maheshwari Public School, Ajmer

2023

Class XII (CBSE) | 92%

Maheshwari Public School, Ajmer

2021

Class X (CBSE) | 85%

Technical Skills

Languages: Python, C, C++, Java, JavaScript

AI/ML: scikit-learn, PyTorch, pandas, NumPy, Matplotlib

Generative AI: RAG, LLMs, FAISS, Sentence Transformers, Ollama

Frameworks & Tools: Flask, Streamlit, Git, GitHub, VS Code

Domains: Machine Learning, Deep Learning, NLP, Generative AI, Data Science

Experience

AI/ML Intern – Data Ingenious Global Pvt Ltd

05 June 2026 – 17 July 2026

SummerXcellence Internship 2026 | 6 weeks

- Worked on AI/ML application development involving machine learning and deep learning workflows.
- Developed a PDF RAG Assistant using Flask, Sentence Transformers, FAISS, and Ollama for document-based question answering.
- Developed a Vision AI Assistant for image-based question answering using a vision-capable LLM and Flask interface.
- Worked on testing, optimization, documentation, and final project presentation.

Projects

PDF RAG Assistant

[🐙 GitHub](#)

Python | Flask, Sentence Transformers, FAISS, Ollama

- Built a Flask-based RAG pipeline for question answering over uploaded PDF documents.
- Extracted and chunked PDF content, generated Sentence Transformer embeddings, and stored vectors in FAISS for semantic retrieval.
- Integrated an LLM through Ollama to generate responses using retrieved document context.

Vision AI Assistant

[🐙 GitHub](#)

Python | Flask, JavaScript, Ollama, Vision LLM

- Built an AI assistant that accepts images and user questions and generates contextual responses using a vision-capable LLM.
- Developed an interactive Flask-based interface with image upload, preview, and conversational interaction.

Movie Recommendation System

[🌐 Live Demo](#) | [🐙 GitHub](#)

Python | scikit-learn, pandas, Streamlit, TMDB API

- Built a content-based recommendation system using cosine similarity on movie metadata.
- Integrated TMDb API for posters, ratings, and improved user experience, with fallback recommendations based on similar genres.
- Developed and deployed an interactive Streamlit web application.

Loan Approval Prediction System

 [Live Demo](#) |  [GitHub](#)

Python / scikit-learn, pandas, Streamlit

- Built an end-to-end classification application to predict loan approval using financial features.
- Developed an interactive Streamlit UI with real-time predictions, confidence scores, and risk analysis.
- Implemented probability breakdowns and key influencing factors for model predictions.

Spam Classifier

 [GitHub](#)

Python / scikit-learn, NLTK, pandas

- Built an NLP text classification model using TF-IDF vectorization to detect spam emails/messages.
- Trained and compared Naive Bayes and Logistic Regression models.

House Price Prediction

 [GitHub](#)

Python / scikit-learn, pandas, NumPy

- Developed a regression model to predict house prices from property-related features.
- Applied data preprocessing, feature engineering, and model evaluation using cross-validation.

Certifications

Frontend Development

Internshala

Covered HTML, CSS, JavaScript and responsive web design fundamentals.

Extra-Curricular Activities

- **IEEE Student Branch Member** – Jaypee University of Information Technology, Solan.
